Software Automation Is The Process Of Creating Software And Systems To Replace Repeatable Processes And Reduce Manual Intervention. It Accelerates The Delivery Of IT Infrastructure And Applications By Automating Manual Processes That Previously Required A Human Touch. Creating More Consistency End-To-End In The Software Delivery Pipeline. Reducing Human Error By Eliminating Manual Processes. Providing For Streamlining Of Frequent And Repeated Processes. Allowing For Scaling Of Software Delivery. Automated Task Require Preparation And Coding, But They Can Be Run Repeatedly Without Requiring Human Effort. The Goal Of An Automation Engineer Is To Eliminate Defects, Errors And Problems With Product Or Software Development And With Business Or Banking Documents Verification Processes. The Predictability Of Automation Allows Companies To Better Plan Ahead And Anticipate Challenges And Opportunities, Rather Than Being Blind Sided By Them.
